

WAS IST WAS Junior. My Body

One action box on each double page

Content:

Children of pre-school age, or in their first year at school, want to know everything - and they ask all kinds of questions. The new WAS IST WAS Junior Books tell children everything they should know about every topic, and they also focus on especially important aspects.

Children learn amazing and special things, and can also explore and investigate. Topics are introduced in a playful way that appeals to young children, and each double page opens up a new, detailed and exciting world. Special discovery flaps and small search elements make kids curious and help to improve their concentration.
